Atrocities Against Doctors

The Department of Forensic Medicine & Toxicology grips an opportunity of welcoming all of you to the CME on an enormously important issue of Medical Practice. In current scenario, practicing Medicine became menacing day by day. It is because of incorporating various Acts and Laws to schematize the Medical Practice. Further, the incidences of violence has augmented the plights of Practicing Doctors. Violence is never been justified against Doctor, who is ostensibly attempting to save a patient's life. The number of incidents of attacks on across the country has risen abruptly in the last few years. Almost 75% of doctors in India have experienced some form of violence at work.. In a Delhi hospital, 40% of resident doctors have faced some form of violence in last 12 months. (*Lancet, 2016*) Why these attacks are taking place? Are they planned? Is any deficiency in service is provoking? Is there any failure in communication? How it can be vetoed? Or what measures are available to take actions against the wrongdoers? To confer all the facets of these assaults lets have the three tier system Medical, Judiciary and Police organization on a same platform for industrious dialogue at length. It seems to be the need of the hour to save the '**saviors**'.
