

PRAVARA INSTITUTE OF MEDICAL SCIENCES (DEEMED TO BE UNIVERSITY)

Loni, Tal. Rahata, Dist. Ahmednagar 413736 NAAC Re-accrediated with 'A' Grade

SYLLABUS

UG Programme- General Surgery

(Competency Based Undergraduate Curriculum will be implemented from August 2019, i.e. MBBS batch admitted for first year in 2019)

Clinical Postings

<u>Learner -Doctor Programme (clinical clerkship)</u>

Phase II

- History taking
- General Examination
- Local Examination with demonstration of signs.
- Psychomotor Skills
- AETCOM of Phase II

Phase III/ I

- All of Phase II plus
- Psychomotor Skills
- Differential diagnosis
- Investigations
- AETCOM of Phase III Part I

Phase III/ II

- All of Phase III Part I plus
- Psychomotor Skills
- Management
- Counselling
- AETCOM Phase III / Part II
- -There shall be end post exam at the end of 1^{st} , 2^{nd} and 3^{rd} clinical posting which will be added to internal assessment for practical
- -At the end of 4th clinical posting of 4 weeks there will be only formative assessment.

Subject: General Surgery <u>Lectures</u>

MBBS Phase II-

Total Teaching hours: 25 hours

S. NO	TOPIC S	COMPETENCIES	SUBTOPICS	AIT	HOURS
			Lecture: 1		
1.	Introductory Lecture		Welcome History of surgery Introduction to surgery and allied subjects Teaching, Learning & Assessment -CBME		1
2.	Metabolic Response to Injury		Lecture: 2		
		SU 1.1			1
			Describe basic concepts of homeostasis, enumerate the metabolic changes in injury and their mediators.	Physiology and Biochemistry	
		SU 1.2	Lecture: 3		1
			Describe the factors that affect the metabolic responses to injury.	Biochemistry	
3.	Shock				
		SU 2.1	Lecture: 4		1
		PA6.3	Describe Pathophysiology of shock, types of shock and principles of resuscitation including fluid replacement and monitoring. Define and describe shock, its pathogenesis and its stages	Pathology and Physiology	

		SU 2.2	Lecture: 5		1
			Describe the clinical features of shock and its appropriate treatment		
4.	Blood andblood components				
		SU 3.1	Lecture: 6		1
		PA22.4	Describe the indications and appropriate use of blood and blood products and complications of blood transfusion. Enumerate blood components and describe their clinical uses	Pathology	
5.	Burns				
		SU 4.1	Lecture: 7		1
			Describe pathophysiology of burns. Describe clinical features, diagnose type and extent of burns.	Physiology	
		SU 4.2, 4.3	Lecture: 8		1
			Plan appropriate treatment of burns. Discuss medicolegal aspect in burns injuries.		
6.	Wound healing and wound care				
		SU 5.1	Lecture: 9		1
		PA5.1 PA4 PA4.	Describe normal wound healing and factors affecting healing. Define and describe the process of repair and regeneration including wound healing and its types Define and describe the general features of acute and chronic inflammation including stimuli, vascular and cellular events Enumerate and describe the mediators of acute	Pathology	
			inflammation		1
		SU 5.3	Lecture: 10		1
			Differentiate the various types of wounds, plan and observe management		

			of wounds.		
7.	Surgical Infections				
		SU 6.1	Lecture: 11		1
			Define and describe the etiology and pathogenesis of surgical infections	Microbiology	
		SU 6.1	Lecture: 12		1
			Define and describe the etiology and pathogenesis of surgical infections- HIV-AIDS, Hepatitis, Gas Gangrene etc.	Microbiology	
		SU 6.2	Lecture: 13		1
			Enumerate prophylactic and therapeutic antibiotics. Plan appropriate management.		
8.	Investigations of a surgical patient				
		SU 9.1	Lecture: 14		1
		PA8.	Choose appropriate biochemical, microbiological, pathological, imaging investigations and interpret the investigative data in a surgical patient. Describe the diagnostic role of cytology and its application in clinical	Biochemistry, Microbiology and Pathology	
		PA8	care. Describe the basis of exfoliative cytology including the technique, stains used		
		MI7.1	Describe the etio-pathogenesis and discuss the laboratory diagnosis of infections of genitourinary system		
9.	Nutrition and fluid				
	therapy	SU 12.1	Lecture: 15		1

			Enumerate the causes and consequences of malnutrition in the surgical patient.	Physiology	
		SU 12.2	Lecture:16		1
			Describe and discuss the methods of estimation and replacement of the fluid and electrolyte requirements in the surgical patients.	Physiology	
		SU 12.3	Lecture:17		1
			Discuss the nutritional requirements of surgical patients, the methods of providing nutritional support and their complications.	Biochemistry	
10	Transplantation				
		SU 13.1	Lecture: 18		1
			Describe the immunological basis of organ transplantation.	Microbiology	
		SU 13.2	Lecture: 19		1
			Discuss the principles of immunosuppressive therapy. Enumerate Indications, describe surgical principles, management of organ Transplantation	Microbiology, Pharmacology	
11	Basic surgical skills				
		SU 14.1	Lecture: 20		1
		MI1.4 MI1.5	Describe Aseptic techniques, sterilisation and disinfection. Classify and describe the different methods of sterilization and disinfection. Discuss the application of the different methods in the laboratory, in clinical and surgical practice Choose the most appropriate method of sterilization and disinfection to be used in specific situations in the laboratory, in clinical and surgical practice	Microbiology	
12	Biohazard disposal				

		SU 15.1	Lecture: 21		1
		MI8.7	Describe classification of hospital waste and appropriate methods of disposal. Demonstrate Infection control practices and use of Personal Protective Equipment (PPE)	Microbiology	
13	Trauma				
		SU 17.1	Lecture: 22		1
			Describe the principles of first aid.		
		SU 17.2	Lecture: 23		1
			Basic Life Support	Anaesthesiology	
14	Skin and Subcutaneous tissue				
		SU 18.1, SU 18.2, 18.3	Lecture: 24		1
			Describe the pathogenesis, clinical features and management of various cutaneous and subcutaneous infections. Describe clinical examination of surgical patient including swelling and discuss investigations for diagnosis and treatment plan. Classify skin tumours. Differentiate different skin tumours and discuss their management.		
15	Vascular diseases				
		SU27.1	Lecture: 25		1
			Describe the etiopathogenesis, clinical features, investigations and principles of treatment of occlusive arterial disease.		

MBBS Phase III- Part I

Total Teaching hours: 25 hours

S. NO	TOPICS	COMPETENCIES	SUBTOPICS	AIT	HOURS
1.	Metabolic response to injury				
		SU1.3	Lecture: 1		1
			Describe basic concepts of postoperative care.		
2.	Surgical Audit and Research				
		SU7.1.7.2	Lecture: 2		1
			Describe the planning and conduct of surgical audit Describe the principles and steps of clinical research in General Surgery	Community Medicine	
3.	Ethics				
		SU8.1, 8.2	Lecture: 3		1
		AS10.3	Describe the principles of Ethics as it pertains to General Surgery and demonstrate professionalism and empathy to the patient undergoing general surgery Describe the role of communication in patient safety		
		SU9.2	Lecture: 4		1
			Biological basis for early detection of cancer and multidisciplinary approach in management of cancer		
4.	Pre, intra and post- operative management.				
		SU10.1	Lecture: 5		1
			Describe the principles of perioperative management of common	AETCOM	
			surgical procedures and Describe the steps and obtain informed		

			consent in a simulated environment		
		IM5.13, IM15.9	Enumerate the indications for ultrasound and other imaging studies including MRCP and ERCP and describe the findings in liver		
			disease. Choose and interpret diagnostic tests based on the clinical diagnosis including complete blood count, PT and PTT, stool examination, occult blood, liver function		
			tests, H. pylori test.		
5.	Anaesthesia and pain management				
		SU11.1, 11.5	Lecture: 6		1
		,	Describe principles of Preoperative assessment. Describe principles of providing post-operative pain relief and management of chronic pain. Describe the principles of	Anaesthesiology	
		AS3.1, AS5.6	preoperative evaluation. Observe and describe the principles and steps/ techniques involved S in common blocks used in Surgery (including brachial plexus blocks)		
		SU11.6	Lecture: 7		1
		AS3.2	Describe Principles of safe General Surgery Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation	Anaesthesiology	
6.	Transplantation				
		SU13.4	Lecture: 9		1
			Counsel patients and relatives on organ donation in a simulated Environment Enumerate the indications for hepatic transplantation	AETCOM	
7.	Basic Surgical Skills				
		SU14.2	Lecture: 10		1
			Describe Surgical approaches, incisions and the use of appropriate instruments in Surgery in general.		

		SU14.3	Lecture: 11		1
			Describe the materials and methods used for surgical wound		
			closure and anastomosis (sutures, knots and needles)		
8.	Trauma				
		SU17.2	Lecture: 12		1
			Demonstrate the steps in Basic Life Support. Transport of	Anaesthesiology	
			injured patient in a simulated environment		
9.	Developmental				
	anomalies of face,				
	mouth and jaws	CI 10 1 10 0	Lecture: 13		1
		SU19.1, 19.2		T.T A A	1
			Describe the etiology and classification of cleft lip and palate. Describe the Principles of reconstruction of cleft lip and	Human Anatomy	
			palate.		
10.	Oropharyngeal		parace.		
	cancer				
		SU20.1, SU20.2	Lecture: 14		1
			Describe etiopathogenesis of oral cancer symptoms and	ENT	
			signs of oropharyngeal cancer.		
			Enumerate the appropriate investigations and discuss the		
			Principles of treatment and reconstructive flap		
		DE 4.1, DE 4.2,			1
		DE 4.3, DE 4.4			
			Discuss the prevalence of oral cancer and enumerate the		
			common types of cancer that can affect tissues of the oral		
			cavity. Discuss the role of etiological factors in the formation of		
			precancerous / cancerous lesions. Identify potential pre-		
			cancerous / cancerous lesions. Counsel patients to risks of oral		
			cancer with respect to tobacco, smoking, alcohol and other causative factors.		
11.	Disorders of		causauve lacturs.		
11.	salivary glands				
		SU21.1	Lecture: 16		1

		AN28.9 , AN34.1 ,	Describe surgical anatomy of the salivary glands, pathology clinical presentation of disorders of salivary glands Describe & demonstrate the parts, borders, surfaces, contents, relations and nerve supply of parotid gland with course of its duct and surgical importance. Describe & demonstrate the morphology, relations and nerve supply		
		SU21.2	Lecture: 17		1
			Enumerate the appropriate investigations and describe the Principles of treatment of disorders of salivary glands		
12.	Thyroid and Parathyroid Glands				
		SU22.1, 22.2	Lecture: 18		1
		AN35.2 PA32.1, IM12.13, IM12.15	Describe the applied anatomy and physiology of thyroid. Describe the etiopathogenesis of thyroidal swellings. Describe the etiopathogenesis of thyroidal swellings. Describe & demonstrate location, parts, borders, surfaces, relations & blood supply of thyroid gland Enumerate, classify and describe the etiology, pathogenesis, pathology and iodine dependency of thyroid swellings, Describe the pharmacology, indications, adverse reaction, interactions of thyroxine and antithyroid drugs. Describe and discuss the indications of thionamide therapy, radio iodine therapy and Surgery in the management of thyrotoxicosis	Human Anatomy, Pathology	
		SU22.4	Lecture: 19		1
			Describe the clinical features, classification and principles of management of thyroid cancer		
		SU22.5	Lecture: 20		1

		IM22.2	Describe the applied anatomy of parathyroid. Describe and discuss the clinical features of hypo - and hyperparathyroidism and the principles of their management Describe the aetiology, clinical manifestations, diagnosis and clinical approach to primary hyperparathyroidism	Human Anatomy	
13.	Adrenal Glands				
		SU23.1, 23.2, 23.3	Lecture: 21		1
			Describe the applied anatomy of adrenal glands. Describe the etiology, clinical features and principles of management of disorders of adrenal gland. Describe the clinical features, principles of investigation and management of Adrenal tumours	Human Anatomy	
14.	Breast				
		SU25.1	Lecture: 22		1
		PA31.1	Describe applied anatomy and appropriate investigations for breast disease Classify and describe the types, etiology, pathogenesis, pathology and hormonal dependency of benign breast disease	Human Anatomy	
		SU25.2	Lecture: 23		1
		PA31.2	Describe the etiopathogenesis, clinical features and principles of management of benign breast disease including infections of the breast. Classify and describe the epidemiology, pathogenesis, classification, morphology, prognostic factors, hormonal dependency, staging and spread of carcinoma of the breast		
		SU 25.3	Lecture: 24		1
			Describe the etiopathogenesis, clinical features, Investigations and principles of treatment of benign and malignant tumours of breast.	Radiodiagnosis	
15.	Vascular				

diseases			
	SU 27.1	Lecture: 25	
	AN19.3,	Describe the etiopathogenesis, clinical features, investigations and principles of treatment of occlusive arterial disease. Explain the concept of "Peripheral heart. Explain anatomical basis of varicose veins and deep vein thrombosis. Identify & demonstrate palpation of vessels (femoral,	
	AN20.5 AN20.9	popliteal, dorsalis pedis, post tibial), Mid inguinal point, Surface projection of: femoral nerve, Saphenous opening, Sciatic, tibial, common peroneal & deep peroneal nerve, great and small saphenous veins	

MBBS Phase III- Part II

Total Teaching hours: 70 hours

S. NO	TOPICS	COMPETENCIES	SUBTOPICS	AIT	HOURS
1.	Anaesthesia and Pain Management				
		SU 11.2	Lecture: 1		1
		AS5.6	Enumerate the principles of general, regional and local anaesthesia. Observe and describe the principles and steps/ techniques involved in common blocks used in Surgery (including brachial plexus blocks)	Anaesthesiology	
		SU 11.4	Lecture: 2		1
			Enumerate the indications and principles of day care General Surgery.	Anaesthesiology	
		SU 16.1	Lecture: 3		1
			Minimal Invasive General Surgery: Describe indications, advantages and disadvantages of Minimally Invasive General Surgery.		
2.	Trauma				
		SU 17.4, 17.5, 17.6	Lecture: 4		1
			Describe pathophysiology, mechanism of head injuries. Describe clinical features for neurological assessment and GCS in head injuries. Choose appropriate investigations and discuss the principles of management of head injuries.		

		SU 17.7	Lecture: 5		1
			Describe the clinical features of soft tissue injuries. Choose appropriate investigations and discuss the principles of management.		
		SU 17.8, 17.9	Lecture: 6		1
			Describe pathophysiology of chest injuries. Describe the clinical features and principles of management of chest injuries.		
		SU17.3	Lecture: 7		1
			Describe pathophysiology of Abdominal injuries. Describe the clinical features and principles of management of Abdominal injuries.		
3.	Pancreas				
		SU 24.1	Lecture: 8		1
		AN55.2	Describe the clinical features, principles of investigation, prognosis and management of pancreatitis. Demonstrate the surface projections of: stomach, liver, fundus of gall bladder, spleen, duodenum, pancreas, ileocecal junction, kidneys & root of mesentery	Human Anatomy	
		SU 24.2	Lecture: 9		1
			Describe the clinical features, principles of investigation, prognosis and management of pancreatic endocrine tumours.		
		SU 24.3	Lecture: 10		1
			Describe the principles of investigation and management of pancreatic disorders including pancreatitis and endocrine tumours.		
4.	Cardio- thoracic General Surgery- Chest- Heart and Lungs				

		SU 26.1, 26.2	Lecture: 11		1
			Outline the role of surgery in the management of coronary heart disease, valvular heart diseases and congenital heart diseases, diseases of Thorax and Diaphragm		
		SU 26.3	Lecture: 12		1
			Describe the clinical features of mediastinal diseases and the principles of management.		
		SU 26.4	Lecture: 13		1
			Describe the etiology, pathogenesis, clinical features of tumors of the lung and the principles of management.		
5.	Vascular Diseases				
		SU 27.1	Lecture: 14		1
			Describe the etiopathogenesis, clinical features, investigations and principles of treatment of occlusive arterial disease.		
		SU 27.2, 27.3, 27.4	Lecture: 15		1
			Demonstrate the correct examination of the vascular system and enumerate and describe the investigation of vascular disease. Describe clinical features, investigations and principles of management of vasospastic disorders. Describe the types of gangrene and principles of amputation.		
		SU 27.5, 27.6	Lecture: 16		1
		AN20.5	Describe the applied anatomy of the venous system of lower limb. Explain anatomical basis of varicose veins and deep vein thrombosis	Human Anatomy	
		SU 27.7	Lecture: 17		1
			Describe pathophysiology, clinical features, Investigations and principles of management of lymph edema, lymphangitis and lymphomas. Explain the concept of lymphoedema and spread of tumors via		

			lymphatics and venous system		
6.	Abdomen				
		SU 28.1	Lecture: 18		1
		AN44.AN44.5	Describe pathophysiology, clinical features, Investigations and principles of management of Hernias Describe & demonstrate extent, boundaries, contents of Inguinal canal including Hesselbach's triangle. Explain the anatomical basis of inguinal hernia.	Human Anatomy	
		SU 28.1	Lecture: 19		1
			Describe pathophysiology, clinical features, Investigations and principles of management of Hernias	Human Anatomy	
		SU 28.1	Lecture: 20		1
		AN44.6	Describe pathophysiology, clinical features, Investigations and principles of management of Hernias Describe & demonstrate attachments of muscles of anterior abdominal wall	Human Anatomy	
		SU 28.1	Lecture:21		1
		AN44.7	Describe pathophysiology, clinical features, Investigations and principles of management of Hernias Enumerate common Abdominal incisions	Human Anatomy	
		SU 28.3	Lecture: 22		1
		AN47.2 AN47.3 AN47.4	Describe causes, clinical features, complications and principles of management of peritonitis and omental pathologies Name & identify various peritoneal folds & pouches with its explanation. Explain anatomical basis of Ascites & Peritonitis Explain anatomical basis of Subphrenic abscess	Human Anatomy	
		SU 28.4	Lecture: 23		1
		AN47.4	Describe pathophysiology, clinical features, investigations and K principles of management of Intraabdominal abscess, mesenteric cyst, and retroperitoneal tumors Explain anatomical basis of Subphrenic abscess		
		SU 28.5	Lecture: 24		1

AN23.1	Describe the applied Anatomy and physiology of esophagus Describe & demonstrate the external appearance, relations, blood supply, nerve supply, lymphatic drainage and applied anatomy of oesophagus	Human Anatomy, Physiology	
SU 28.6	Lecture: 25		1
	Describe the clinical features, investigations and principles of management of benign and malignant disorders of esophagus		
SU 28.7	Lecture: 26		1
AN47.6 AN47.1	Describe the applied anatomy and physiology of stomach Explain the anatomical basis of Splenic notch, accessory spleens, Kehr's sign, different types of vagotomy, liver biopsy (site of needle puncture), referred pain in cholecystitis, Obstructive jaundice, referred pain around umbilicus, radiating pain of kidney to groin &Lymphatic spread in carcinoma stomach Describe & identify boundaries and recesses of Lesser & Greater sac	Human Anatomy	
SU 28.8	Lecture: 27		1
	Describe and discuss the aetiology, the clinical features, investigations and principles of management of congenital hypertrophic pyloric stenosis, Peptic ulcer disease, Carcinoma stomach		
SU 28.10	Lecture: 28		1
AN47.4 AN47.6	Describe the applied anatomy of liver. Describe the clinical features, Investigations and principles of management of liver abscess, hydatid disease, injuries and tumors of the liver Explain anatomical basis of Subphrenic abscess Liver biopsy (site of needle puncture), referred pain in cholecystitis, Obstructive jaundice	Human Anatomy	
SU 28.10	Lecture: 29		1

	Describe the applied anatomy of liver. Describe the clinical features, Investigations and principles of management of liver abscess, hydatid disease, injuries and tumours of the liver	Human Anatomy	
SU 28.10	Lecture: 30		1
AN47.3	Describe the applied anatomy of liver. Describe the clinical features, Investigations and principles of management of liver abscess, hydatid disease, injuries and tumors of the liver Explain anatomical basis of Ascites & Peritonitis	Human Anatomy	
SU 28.11	Lecture: 31		1
AN47.6	Describe the applied anatomy of spleen. Describe the clinical features, investigations and principles of management of splenic injuries. Describe the post-splenectomy sepsis – prophylaxis Explain the anatomical basis of Splenic notch, accessory spleens, Kehr's sign	Human Anatomy	
SU 28.12	Lecture: 32		1
AN47.7	Describe the applied anatomy of biliary system. Describe the clinical features, investigations and principles of management of diseases of biliary system Mention the clinical importance of Calot's triangle	Human Anatomy	
SU 28.12	Lecture: 33		1
	Describe the applied anatomy of biliary system. Describe the clinical features, investigations and principles of management of diseases of biliary system	Human Anatomy	
SU 28.12	Lecture: 34		1
AN47.10 AN47.11	Describe the applied anatomy of biliary system. Describe the clinical features, investigations and principles of management of diseases of biliary system Enumerate the sites of portosystemic anastomosis Explain the anatomic basis of hematemesis & caput medusae in portal hypertension	Human Anatomy	
SU 28.13, 28.14	Lecture: 35		1

T			I	T
		Describe the applied anatomy of small and large	Human	
	AN52.6	intestine Describe the development and congenital	Anatomy	
		anomalies of foregut, midgut & hindgut	, and the second	
	SU 28.13, 28.14	Lecture: 36		1
		Describe the clinical features, investigations and	Human	
		principles of management of disorders of small and large	Anatomy	
		intestine including neonatal obstruction and Short gut	J	
		syndrome		
	SU 28.13, 28.14	Lecture: 37		1
		Describe the clinical features, investigations and	Human	
		principles of management of disorders of small and large	Anatomy	
		intestine including neonatal obstruction and Short gut	<i>-</i>	
		syndrome		
	SU 28.13, 28.14	Lecture: 38		1
		Describe the clinical features, investigations and	Human	
		principles of management of disorders of small and large	Anatomy	
		intestine including neonatal obstruction and Short gut	J	
		syndrome		
	SU 28.13, 28.14	Lecture: 39		1
		Describe the clinical features, investigations and	Human	
		principles of management of disorders of small and large	Anatomy	
		intestine including neonatal obstruction and Short gut	J	
		syndrome		
	SU 28.13, 28.14	Lecture: 40		1
		Describe the clinical features, investigations and	Human	
		principles of management of disorders of small and large	Anatomy	
		intestine including neonatal obstruction and Short gut	<i>-</i> J	
		syndrome		
	SU 28.13, 28.14	Lecture: 41		1
		Describe the clinical features, investigations and	Human	
		principles of management of disorders of small and large	Anatomy	
		intestine including neonatal obstruction and Short gut		
		syndrome		
	SU 28.15	Lecture: 42		1

			Describe the clinical features, investigations and		
			principles of management of diseases of Appendix		
			including appendicitis and its complications.		
		SU 28.16	Lecture: 43		1
			Describe applied anatomy including congenital	Human	
		AN49.4	anomalies of the rectum and anal canal Describe & demonstrate boundaries, content & applied anatomy of Ischiorectal fossa	Anatomy	
		SU 28.16	Lecture: 44		1
		AN48.8	Describe applied anatomy including congenital	Human	
			anomalies of the rectum and anal canal Mention the structures palpable during vaginal & rectal examination	Anatomy	
		SU 28.17	Lecture: 45		1
			Describe the clinical features, investigations and principles of management of common anorectal diseases		
		SU 28.17	Lecture: 46		1
			Describe the clinical features, investigations and principles of management of common anorectal diseases		
7.	Urinary System				
		SU 29.1	Lecture: 47		1
			Describe the causes, investigations and principles of management of Hematuria		
		SU 29.2	Lecture: 48		1
			Describe the clinical features, investigations and	Human	
		AN52.7	principles of management of congenital anomalies of genitourinary system Describe the development of urinary system	Anatomy	
		SU 29.3	Lecture: 49		1
		MI7.1	Describe the Clinical features, Investigations and principles of management of urinary tract infections Describe the etio-pathogenesis and discuss the laboratory diagnosis of infections of genitourinary system	Microbiology	
		SU 29.4	Lecture: 50		1
			Describe the clinical features, investigations and principles of management of hydronephrosis		

		SU 29.5	Lecture: 51		1
			Describe the clinical features, investigations and		
			principles of management of renal calculi		
		SU 29.5	Lecture: 52		1
			Describe the clinical features, investigations and		
			principles of management of renal calculi		
		SU 29.6	Lecture: 53		1
			Describe the clinical features, investigations and principles of management of renal tumours		
		SU 29.7	Lecture: 54		1
			Describe the principles of management of acute and chronic retention of urine		
		SU 29.8	Lecture: 55		1
			Describe the clinical features, investigations and		
			principles of management of bladder cancer		
		SU 29.9	Lecture: 56		1
			Describe the clinical features, investigations and	Human	
		AN48.7	principles of management of disorders of prostate Mention the lobes involved in benign prostatic hypertrophy & prostatic cancer	Anatomy	
		SU 29.10	Lecture: 57		1
			Describe clinical features, investigations and management of urethral strictures and urethral injuries		
8.	Penis, Testis and scrotum		management of arctification and arctificating injuries		
		SU 30.1	Lecture: 58		1
			Describe the clinical features, investigations and	Human	
		AN46.5	principles of management of phimosis, paraphimosis. Explain the anatomical basis of Phimosis & Circumcision	Anatomy	
		SU 30.1	Lecture: 59		1
			Describe the clinical features, investigations and principles of management of carcinoma penis.		
		SU 30.2, 30.3	Lecture: 60		1

	AN46.1	Describe the applied anatomy clinical features, investigations and principles of management of undescended testis. Describe the applied anatomy clinical features, investigations and principles of management of epidydimo-orchitis Describe & demonstrate coverings, internal structure, side determination, blood supply, nerve supply, lymphatic drainage & descent of testis with its applied anatomy	Human Anatomy	
	SU 30.4, 30.5	Lecture: 61		1
	AN46.4	Describe the applied anatomy clinical features, investigations and principles of management of varicocele and hydrocoele Explain the anatomical basis of varicocele	Human Anatomy	
	SU 30.6	Lecture: 62		1
		Describe classification, clinical features, investigations and principles of management of benign tumours of testis.		
	SU 30.6	Lecture: 63		1
		Describe classification, clinical features, investigations and principles of management of malignant tumours of testis.		
9.		Lecture: 64		1
		Revision Lecture 1		
10.		Lecture: 65		1
		Revision Lecture 2		
11.		Lecture: 66		1
		Revision Lecture 3		
12.		Lecture: 67		1
		Revision Lecture 4		
13.		Lecture: 68		1
		Revision Lecture 5		

14.		Lecture: 69	1
		Revision Lecture 6	
15.		Lecture: 70	1
		Revision Lecture 7	

Self-Directed Learning

MBBS phase III/I

Total Teaching hours: 5 hours

*These are suggested topics which can be modified at institutional level

Sr.				AIT	HOURS
No.	TOPICS	COMPETENCIES	SUBTOPICS		
1.	Ethics				
		SU8.1	SDL:1		3
			Describe the principles of Ethics as it pertains to General		
			Surgery.		
			Demonstrate Professionalism and empathy to the patient.		
2.	Transplantation				
		SU13.3	SDL:2		2
			Discuss the legal and ethical issues concerning organ donation.		
			Counsel patients and relatives on organ donation in a		
			simulated.		

MBBS phase III/II

Total Teaching hours: 15 hours

*These are suggested topics which can be modified at institutional level

Sr.	TOPICS	COMPETENCIES	SUBTOPICS	HOURS
No	//h:4			
1.	Thyroid	GTT 00 0		
		SU 22.2,		4
		SU 22.3, SU22.4	SDL:1	
			Describe the etiopathogenesis of thyroidal swellings.	
			Demonstrate and document the correct clinical examination of thyroid swellings and discus the differential diagnosis and their management. Describe the clinical features, classification and principles of	
2.	Breast		management of thyroid cancer	
4.	breast	OII OF O	CDI.0	4
		SU 25.2, SU 25.3	SDL:2	4
			Describe the etiopathogenesis, clinical features and principles of management of benign breast disease including infections of the breast. Describe the etiopathogenesis, clinical features, Investigations and principles of treatment of benign and malignant tumours of breast.	
3.	Oral malignancy			
		SU 20.1, SU 20.2	SDL:3	3
			Describe etiopathogenesis of oral cancer symptoms and signs of oropharyngeal cancer. Enumerate the appropriate investigations and discuss the Principles of treatment.	
4.	Communication skills – Role play			
		AETCOM	SDL:4	4

Small Group Discussion

MBBS phase III/I -

Small group teachings/ Tutorials/ Integrated teaching/ Practical's: 35 hours

- Competencies written in red (horizontal) and green (vertical) are of alignment and integration.
- 25 % of allotted time of the third professional shall be utilised for integrated learning with pre- and paraclinical subjects and shall be assessed during the clinical subject's examination.
- This allotted time will be utilised as integrated teaching by para-clinical subjects with clinical subjects (as Applied Anatomy, Clinical Pathology, Clinical Pharmacology, Clinical Microbiology, Radio diagnosis, Instruments, Operative Surgery, Communication skills etc.).

S. NO	TOPICS	COMPETENCIES	SUBTOPICS	AIT	HOURS
1.	Metabolic response to injury	COMPETENCIES	SUBTOFICS		
	- co mgury	SU1.3	SGD: 1		1
		AS3.1, AS9.3, AS9.4	Describe basic concepts of perioperative care- preoperative Describe the principles of preoperative evaluation Describe the principles of fluid therapy in the preoperative period Enumerate blood products and describe the use of blood products in the preoperative period	Anaesthesiology	
		SU1.3	SGD: 2		1
			Describe basic concepts of perioperative careintraoperative	Anaesthesiology	
		SU1.3,	SGD: 3		1

		AS6.3 Describe basic concepts of perioperative care- postoperative Describe the common complications encountered by patients in the recovery room, their recognition and principles of management		Anaesthesiology	
2.	Shock				4
		SU2.1,	SGD: 4		1
		PA6.3	Describe Pathophysiology of shock, types of shock & principles of resuscitation including fluid replacement and monitoring. Define and describe shock, its pathogenesis and its stages	Pathology, Physiology	
		SU2.2,	SGD: 5		1
		IM15.3	Describe the clinical features of shock and its appropriate treatment Describe and discuss the physiologic effects of acute blood and volume loss	General Medicine	
3.	Blood and blood components				
		SU3.2	SGD: 6		1
		PA22.4	Observe blood transfusions Enumerate blood components and describe their clinical uses	Pathology	
4.	Burns				
		SU4.1, SU4.2	SGD: 7		1
			Elicit document and present history in a case of Burns and perform physical examination. Describe Pathophysiology of Burns. Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	Physiology	
		SU4.3	SGD: 8		1
		FM2.25	Discuss the Medicolegal aspects in burn injuries. Describe types of injuries, clinical features, pathophysiology, postmortem findings and medico-legal aspects in cases of burns, scalds, lightening, electrocution and radiations	Forensic Medicine	1

5.	Wound healing and wound care				
		SU5.2, SU5.3	SGD: 9		1
			Elicit, document and present a history in a patient		
			presenting with wounds.		
			Differentiate the various types of wounds, plan and		
			observe management of wounds.		
		SU5.4	SGD:10		1
			Discuss medico legal aspects of wounds		
					1
		FM3.3 , FM3.4	Mechanical injuries and wounds: Define, describe and classify different types of mechanical injuries, abrasion, bruise, laceration, stab wound, incised wound, chop wound, defense wound, self-inflicted/fabricated wounds and their	Forensic Medicine	
		, FM3.6	medico-legal aspects. Mechanical injuries and wounds: define injury, assault & hurt. Describe IPC pertaining to injuries Mechanical injuries and wounds:Describe healing of injury and fracture of bones with its medico-legal importance		
6.	Surgical infections				
		SU6.1	SGD:11		1
			Define and describe the aetiology and pathogenesis of surgical	Microbiology	
		MI7.1	Infections Describe the etio-pathogenesis and discuss the laboratory diagnosis of infections of genitourinary system		
		SU6.2	SGD:12		1
			Enumerate Prophylactic and therapeutic antibiotics		
			Plan appropriate management		
7.	Surgical Audit and				

	Research				
		SU7.1, SU7.2	SGD:13		1
			Describe the Planning and conduct of Surgical audit Describe the principles and steps of clinical research in General Surgery	Community Medicine	
8.	Ethics				
		SU8.1 ,SU8.2	SGD:14		1
			Describe the principles of Ethics as it pertains to General Surgery Demonstrate Professionalism and empathy to the patient undergoing general surgery	Forensic Medicine, AETCOM	
9.	Investigation of surgical patient				
		SU9.1	SGD:15		1
			Choose appropriate biochemical, microbiological, pathological, imaging investigations and interpret the investigative data in a surgical patient	Biochemistry, microbiology, pathology	
		SU9.2	SGD 16		
			Biological basis for early detection of cancer and multidisciplinary approach in management of cancer		
10.	Pre, intra and post- operative management.				
		SU10.1	SGD:17		1
			Describe the principles of perioperative management of common		
			surgical procedures		
1.	Nutrition and fluid therapy				
		SU12.1	SGD:18	Physiology,Biochemist ry	1

	1	<u> </u>	<u> </u>	ı	1
			Enumerate the causes and consequences of		
			malnutrition in the surgical patient		
			Describe and discuss the methods of estimation and		
		SU12.2	replacement Of the fluid and electrolyte		
			requirements in the surgical patient		
			Discuss the nutritional requirements of surgical		
			patients, the methods of providing nutritional		
		SU12.3	support and their complications		
12.	Transplantation				
		SU13.3	SGD: 19	AETCOM	1
			Discuss the legal and ethical issues concerning organ donation		
13.	Basic Surgical Skills				
		SU14.2	SGD: 20		1
			Describe Surgical approaches, incisions and the use of		
			appropriate		
			instruments in Surgery in general.		
		SU14.3	SGD: 21		1
			Describe the materials and methods used for surgical wound		
			closure and anastomosis (sutures, knots and needles)		
14	Biohazard Disposal	SU15.1	SGD 22	Microbiology, Community medicine	1
	-	MI8.7	Describe c lassification of hospital waste and appropriate methods of disposal Demonstrate Infection control practices and use of Personal Protective Equipments (PPE)	Community medicine	
15.	Trauma				
		SU17.3	SGD:23		1
			Describe the Principles in management of mass		
			casualties		

16.	Skin and Subcutaneous Tissue		SGD 24		1
		SU18.1 SU18.2	Describe the pathogenesis, clinical features and management of various cutaneous and subcutaneous infections. Classify skin tumors		
		SU18.3	Differentiate different skin tumors and discuss their management. Describe and demonstrate the clinical examination of surgical patient including swelling and order relevant investigation for diagnosis. Describe and discuss appropriate treatment plan.		
17.	Developmental anomalies of face, mouth and jaws				
		SU19.1, 19.2	SGD:25	Human Anatomy	1
			Describe the etiology and classification of cleft lip and palate. Describe the Principles of reconstruction of cleft lip and palate		
18	Oropharyngeal carcinoma		SGD 26	ENT	1
		SU20.1 SU20.2	Describe etiopathogenesis of oral cancer symptoms and signs of oropharyngeal cancer Enumerate the appropriate investigations and discuss the Principles of treatment		
19.	Disorders of salivary glands				
		SU21.1	SGD:27	Human Anatomy	1
		AN34.1 AN28.9	Describe surgical anatomy of the salivary glands, pathology, and clinical presentation of disorders of salivary glands Describe & demonstrate the morphology, relations and nerve supply of submandibular salivary gland & submandibular ganglion		

			D		
			Describe & demonstrate the parts, borders, surfaces, contents, relations and nerve supply of parotid gland with		
			course of its duct and surgical importance		
		SU21.2	SGD:28		1
			Enumerate the appropriate investigations and		
			describe the Principles of treatment of disorders of		
			*		
20			salivary glands		
20.	Thyroid and Parathyroid Glands				
	G.3.3.3.3.3	SU22.1, 22.2	SGD:29	Human anatomy, Pathology	1
			Describe the applied anatomy and physiology of thyroid. Describe the etiopathogenesis of thyroidal swellings.		
		AN35.2	Describe & demonstrate location, parts, borders, surfaces, relations & blood supply of thyroid gland		
		SU22.3	SGD:30		1
		PA32.1	Demonstrate and document the correct clinical examination of thyroid swellings and discus the differential diagnosis and their management Enumerate, classify and describe the etiology, pathogenesis, pathology and iodine dependency of thyroid swellings		
		SU22.4, SU22.5	SGD:31		1
		AN35.8	Describe the clinical features, classification and principles of management of thyroid cancer		_
			Describe the applied anatomy of parathyroid Describe and discuss the clinical features of hypo -		
			and hyperparathyroidism and the principles of their management		
			Describe the anatomically relevant clinical features of Thyroid swellings		
21.	Breast				
		SU 25.1	SGD:32	Human anatomy,	1

				Radiodiagnosis	
		AN9.2	Describe applied anatomy and appropriate investigations for breast disease Breast-Describe the location, extent, deep relations, structure, age changes, blood supply, lymphatic drainage, microanatomy and applied anatomy of breast		
		SU 25.2	SGD:33		1
			Describe the etiopathogenesis, clinical features and principles of management of benign breast disease including infections of the breast.		
22.	Vascular diseases				
		SU 27.1, 27.2, 27.3, 27.4	SGD:34	Human Anatomy	1
		AN20.9	Describe the etiopathogenesis, clinical features, investigations and principles of treatment of occlusive arterial disease. Demonstrate the correct examination of the vascular system and enumerate and describe the investigation of vascular disease. Describe clinical features, investigations and principles of management of vasospastic disorders. Describe the types of gangrene and principles of amputation. Identify & demonstrate palpation of vessels (femoral,		
			popliteal, dorsalis pedis, post tibial), Mid inguinal point, Surface projection of: femoral nerve, Saphenous opening, Sciatic, tibial, common peroneal & deep peroneal nerve, great and small saphenous veins		
		SU 27.5, 27.6, 27.7	SGD:35		1

Mention the extent, relations and applied anatomy of	AN6	6 2 ANO2 7	Describe the applied anatomy of venous system of lower limb. Describe pathophysiology, clinical features, Investigations and principles of management of DVT and Varicose veins. Describe pathophysiology, clinical features, investigations and principles of management of Lymph edema, lymphangitis and Lymphomas. Explain the concept of lymphoedema and spread of tymphoedema and spread of	
lymphatic duct	ANO	ANO.S ANZS.1		

MBBS Phase III/II-

Small group teachings/ Tutorials/ Integrated teaching/ Practical's: 125 hours

- Competencies written in red (horizontal) and green (vertical) are of alignment and integration.
- 25 % of allotted time of the third professional shall be utilised for integrated learning with pre- and para- clinical subjects and shall be assessed during the clinical subject's examination.
- This allotted time will be utilised as integrated teaching by para-clinical subjects with clinical subjects (as Applied Anatomy, Clinical Pathology, Clinical Pharmacology, Clinical Microbiology, Radio diagnosis, Instruments, Operative Surgery, Communication skills etc.).

SR. NO.	TOPICS	COMPETENCIES	SUBTOPICS	AIT	HOURS
1.	Shock				
		SU 2.3	SGD: 1		1
		PA6.3	Communicate and counsel patients and families about the treatment and prognosis of shock demonstrating empathy and care. Define and describe shock, its pathogenesis and its stages	AETCOM	
2	Blood and blood components				
		SU 3.3	SGD: 2		1
		PA22.4	Councell patients and family/friend for blood transfusion and blood donation. Enumerate blood components and describe their clinical uses	Pathology	
3.	Burns				
		SU 4.4	SGD: 3		1
			Communicate and counsel patients and families on the outcome and rehabilitating demonstrating empathy and care.		

4.	Surgical infections				
		SU 6.1, 6.2,	SGD: 4		1
		OR3.1,OR3.3,OR4.	Communicate and counsel patients and families on the outcome and rehabilitating demonstrating empathy and care. Describe and discuss the aetiopathogenesis, clinical features, Investigations and principles of management of Bone and Joint infections. Describe and discuss the clinical features, Investigation and principles of management of Tuberculosis affecting major joints (Hip, Knee) including cold abcess and caries spine Acute Osteomyelitis Subacute osteomyelitis Acute Suppurative arthritis Septic arthritis & HIV infection Spirochaetal infection f) Skeletal Tuberculosis. Participate as a member in team for procedures like drainage of abscess, sequestrectomy/	Orthopaedics	
5.	Ethics				
		SU 8.3	SGD: 5		1
			Discuss Medico-legal issues in surgical practice	Forensic Medicine, AETCOM	
6.	Investigation of surgical patient				
		SU 9.2	SGD: 6		1

			Biological basis for early detection of cancer		
			and multidisciplinary approach in		
			management of cancer		
		SU 9.3	SGD: 7		1
			Communicate the results of surgical		
			investigations and counsel the patient		
			appropriately.		
7.	Pre, intra and post operative management.				
	management.	SU 10.2	SGD: 8		1
			Describe the steps and obtain informed	AETCOM	
			consent in a simulated environment.		
			Describe and discuss the		
			aetiopathogenesis, clinical presentation,		
			identification, functional changes, acute		
			care, stabilization, management and		
			rehabilitation of the elderly undergoing		
		IM24.11	surgery		
		SU 10.3	SGD: 9		1
			Observe common surgical procedures and		
			assist in minor surgical procedures; observe		
			emergency life saving surgical procedures.		
		SU 10.4	SGD: 10		1
			Perform basic surgical skills such as first aid		
			including suturing and minor surgical		
			procedures in simulated environment.		
8.	Anaesthesia and Pain Management				
		SU 11.3	SGD: 11		1
				Anaesthesiology	
			Demonstrate maintenance of an airway in a		
			mannequin or equivalent.		
		SU 11.1, 11.2	SGD: 12		1

			Describe principles of preoperative	Anaesthesiology	
			assessment. Enumerate the principles of		
			general, regional and local anaesthesia.		
		SU 11.3, 11.4,	SGD: 13		1
		11.5			
			Enumerate the indications and principles of	Anaesthesiology	
			day care general surgery. Describe		
			principles of providing post-operative pain		
			relief and management of chronic pain.		
			Describe principles of safe General surgery.		
9.	Nutrition and fluid therapy				
		SU 12.1, 12.2	SGD: 14		1
			Enumerate the causes and consequnces of	Physiology	
			malnutrition in the surgical patient.		
			Describe and discuss the methods of		
			estimation and replacement of the fluid and		
			electrolyte requirements in the surgical		
			patient.		
		SU 12.3	SGD: 15		1
			Discuss the nutritional requirements of	Biochemistry	
			surgical patients, the methods of providing		
			nutritional support and their		
			complications.		
10.	Transplantation				
		SU 13.3	SGD: 16		1
				AETCOM	
			Discuss the legal and ethical issues		
			concerning organ donation.		
11.	Biohazard disposal				
		SU 15.1	SGD: 17		1
				Microbiology	
			Describe classification of hospital waste and		
			appropriate methods of disposal.		
12.	Minimally invasive General				

	surgery				
		SU 16.1	SGD: 18		1
			Minimally invasive General surgery:		
			Describe indications advantages and		
			disadvantages of minimally invasive		
			General surgery.		
13.	Trauma				
		SU 17.4	SGD: 19		1
			Describe pathophysiology, mechanism of		
			head injuries.		
		SU 17.5	SGD: 20		1
			Describe clinical features for neurological		
			assessment and GCS in head injuries.		
		SU 17.6,	SGD: 21		1
			Choose appropriate investigations and	Physical	
			discuss the principles of management of	Medicine &	
			head injuries.	Rehabilitation	
			Describe the clinical features, evaluation,		
			diagnosis and management of disability		
		PM8.1	following traumatic brain injury		
		SU 17.7	SGD: 22		1
			Describe the clinical features of soft tissue	Orthopaedics	
			injuries. Choose appropriate investigations		
			and discuss the principles of management.		
			Describe and discuss the aetiopathogenesis,		
			clinical features, Investigations and		
			principles of management of benign and		
			malignant bone tumours and pathological		
		OR11.1	fractures		
		SU 17.8	SGD: 23		1
			Describe pathophysiology of chest injuries.		
		SU 17.9	SGD: 24		1
			Describe the clinical features and		
			principles		

			of management of chest injuries.		
		SU 17.10	SGD: 25		1
			Demonstrate Airway maintenance.	Anaesthesiology	
			Recognise and manage tension		
			pneumothorax, hemothorax and flail chest		
			in simulated environment.		
14.	Skin and subcutaneous tissue				
		SU 18.3.	SGD: 26		1
			Describe and demonstrate the clinical	Physical	
			examination of surgical patient including	Medicine &	
			swelling and order relevant investigation	Rehabilitation	
			for diagnosis. Describe and discuss		
			appropriate treatment plan.		
			Enumerate the indications of debridement,		
		PM7.9	and Split thickness skin grafting.		
15.	Oropharyngeal cancer				
		SU 20.1	SGD: 27		1
			Describe etiopathogenesis of oral cancer.	ENT	
			Symptoms and signs of oropharyngeal		
			cancer.		
		SU 20.2	SGD: 28		1
			Enumerate the appropriate investigations		
			for oropharyngeal cancer.		
		SU 20.2	SGD: 29		1
			Enumerate the appropriate investigations		
			for oropharyngeal cancer.		
		SU 20.3	SGD: 30		1
			Enumerate the principles of treatment		
			for		
			oropharyngeal cancer.		
		SU 20.3	SGD: 31		1
			Enumerate the principles of treatment		
			for		

			oropharyngeal cancer.	
16.	Adrenal Glands			
		SU 23.1, 23.2	SGD: 32	1
			Hum	ian
			Anato	omy,General
			Describe the applied anatomy of adrenal Medi	icine
			glands. Describe the etiology, clinical	
			features and principles of management of	
			disorders of adrenal glands.	
		SU 23.3	SGD: 33	1
			Describe the clinical features, principles of	
			investigation and management of adrenal	
			tumors.	
17.	Pancreas			
		SU 24.1,	SGD: 34	1
			Describe the clinical features, principles of Hum	ıan
			investigation, prognosis and management of Anat	omy
			pancreatitis.	
			Describe the etiology, pathogenesis,	
			manifestations, laboratory, morphologic	
			features, complications and metastases of	
		PA32.6	pancreatic cancer	
		SU 24.2	SGD: 35	1
			Describe the clinical features, principles of	
			investigation, prognosis and management	
			of pancreatic endocrine tumors.	
		SU 24.3	SGD: 36	1
			Describe the principles of investigation and	
			management of pancreatic disorders	
			including pancreatitis and endocrine	
			tumors.	
18.	Breast			
_		SU 25.3	SGD: 37	1

			Describe the etiopathogenesis, clinical	Radiodiagnosis	
			features, investigations and principles of		
			treatment of benign and malignant tumors		
			of breast.		
		SU 25.3	SGD: 38		1
			Describe the etiopathogenesis, clinical	Radiodiagnosis	
			features, investigations and principles of		
			treatment of benign and malignant tumors		
			of breast.		
		SU 25.4	SGD: 39		1
			Counsel the patient and obtain informed		
			consent for treatment of malignant		
			conditions of the breast.		
		SU 25.5	SGD: 40		1
			Demonstrate the correct technique to		
			palpate the breast for breast swelling in a		
			mannequin or equivalent.		
19.	Cardio-thoracic General Surgery- Chest- Heart and Lungs				
		SU 26.1	SGD: 41		1
			Outline the role of surgery in the		
			management of coronary heart disease,		
			valvular heart diseases and congenital heart		
			diseases.		
		SU 26.2	SGD: 42		1
			Outline the role of surgery in the		
			management of diseases of Thorax and		
			Diaphragm		
		SU 26.3	SGD: 43		1
			Describe the clinical features of mediasitnal		
			diseases and the principles of management.		

			Describe the etiology, pathogenesis, clinical	
			features of tumors of the lung and the	
			principles of management.	
20.	Vascular Diseases			
		SU 27.1	SGD: 45	1
			Describe the etiopathogenesis, clinical	
			features, investigations and principles of	
			treatment of occlusive arterial disease.	
		SU 27.2	SGD: 46	1
			Demonstrate the correct examination of the	
			vascular system and enumerate and	
			describe the investigation of vascular	
			disease.	
		SU 27.3	SGD: 47	1
			Describe clinical features, investigations	
			and principles of management of	
			vasospastic disorders.	
		SU 27.4	SGD: 48	1
			Describe the types of gangrene and	
			principles of amputation.	
		SU 27.5	SGD: 49	1
			Describe the applied anatomy of the	
			venous system of lower limb.	
		SU 27.6	SGD: 50	1
			Describe pathophysiology, clinical features,	
			investigations and principles of	
			management of DVT and varicose veins.	
		SU 27.7	SGD: 51	1
			Describe pathophysiology, clinical features,	
			Investigations and principles of	
			management of lymph edema, lymphangitis	
			and lymphomas.	
		SU 27.8	SGD: 52	1

			Demonstrate the correct examination of		
			the lymphatic system.		
21.	Abdomen				
		SU 28.1.	SGD: 53.		1
			Describe pathophysiology, clinical features,	Human	
			Investigations and principles of	Anatomy	
			management of Hernias .		
			Describe & demonstrate the Planes		
			(transpyloric, transtubercular, subcostal,		
			lateral vertical, linea alba, linea		
			semilunaris), regions & Quadrants of		
		AN44.1.	abdomen .		
		SU 28.1.	SGD: 54		1
			Describe pathophysiology, clinical features,	Human	
			Investigations and principles of	Anatomy	
			management of Hernias .		
			Describe & demonstrate extent,		
			boundaries, contents of Inguinal canal		
		AN44.4 . AN44.5	including Hesselbach's triangle.		
		SU 28.1	SGD: 55		1
			Describe pathophysiology, clinical features,		
			Investigations and principles of		
			management of Hernias		
		SU 28.1	SGD: 56		1
			Describe pathophysiology, clinical features,	Human	
			Investigations and principles of	Anatomy	
		AN44.4 . AN44.5	management of Hernias .		
			Explain the anatomical basis of inguinal		
			hernia.		
		SU 28.1	SGD: 57		1

Describe pathophysiology, clinical features, Human Investigations and principles of Anatom	an I
Investigations and principles of Anafo	
	my
management of Hernias .	
Describe and demonstrate boundaries,	
AN15.3 floor, roof and contents of femoral triangle	
SU 28.1,AN44.6, SGD: 58	1
Describe pathophysiology, clinical features, Huma	an
Investigations and principles of Anaton	my
management of Hernias.	
Describe & demonstrate attachments of	
muscles of anterior abdominal wall	
SU 28.3 SGD: 59	1
Describe causes, clinical features,	
complications and principles of mangament	
of peritonitis	
SU 28.3 SGD: 60	1
Describe causes, clinical features,	
complications and principles of	
managament of peritonitis	
SU 28.3 SGD: 61	1
Describe causes, clinical features, Huma	an
complications and principles of mangament Anaton	my
of omental pathologies. Describe &	
demonstrate major viscera of abdomen	
under following headings (anatomical	
position, external and internal features,	
important peritoneal and other relations,	
blood supply, nerve supply, lymphatic	
AN47.5 drainage and applied aspects)	
SU 28.4 SGD: 62	1

Г			1	
		Describe pathophysiology, clinical features,		
		investigations and K principles of		
		management of Intra-abdominal abscess,		
		mesenteric		
		cyst, and retroperitoneal tumors		
	SU 28.5	SGD: 63		1
		Describe the applied Anatomy and	Human	
		physiology of esophagus.	Anatomy,	
		Enumerate the indications for use of	Physiology	
		Surgery and botulinum toxin in the	111,010108)	
	IM19.9	treatment of movement disorders		
	SU 28.5,	SGD: 64		1
	,	Describe the applied Anatomy and	Human	
		physiology of esophagus.	Anatomy,	
		Elicit document and present an appropriate	Physiology	
		history that identifies the route of bleeding,	1 Hysiology	
		quantity, grade, volume loss, duration,		
		etiology, comorbid illnesses and risk		
		factors. Distinguish between upper and		
		lower gastrointestinal bleeding based on		
	IM15.4, IM15.6	the clinical features		
	SU 28.6,	SGD: 65		1
	50 26.0,			1
		Describe the clinical features, investigations		
		and principles of management of benign		
	077.05.5	and malignant disorders of esophagus.		
	SU 28.6	SGD: 66		1
		Describe the clinical features, investigations		
		and principles of management of benign and		
		malignant disorders of esophagus		
	SU 28.7	SGD: 67		1
			Human	
		Describe the applied anatomy and	Anatomy	
		physiology of stomach		
	SU 28.8,	SGD: 68		1

		<u> </u>		
		Describe and discuss the aetiology, the		
		clinical features, investigations and		
		principles of management of congenital		
		hypertrophic pyloric stenosis, Peptic ulcer		
		disease, Carcinomastomach.		
		Describe and enumerate the indications,		
		pharmacology and side effects of		
		pharmacotherapy of acid peptic disease		
	IM15.15	including Helicobacter pylori		
	SU 28.9	SGD: 69		1
		Demonstrate the correct technique of		
		examination of a patient with disorders of		
		the stomach.		
		Enumerate describe and discuss the		
		evaluation and steps involved in stabilizing a		
		patient who presents with acute volume		
	IM15.2	loss and GI bleed		
	SU 28.10	SGD: 70		1
		Describe the applied anatomy of liver.	Human	
		Describe the clinical features, Investigations	Anatomy	
		and principles of management of liver		
		abscess, hydatid disease, injuries and		
		tumors of the liver.		
		Describe and discuss the management of		
		hepatitis, cirrhosis, portal hypertension,		
		ascites, spontaneous, bacterial peritonitis		
	IM5.16	and hepatic encephalopathy		
	SU 28.10	SGD: 71		1
		Describe the applied anatomy of liver.	Human	
		Describe the clinical features, Investigations	Anatomy	
		and principles of management of liver		
		abscess,		
		hydatid disease, injuries and tumors of the		
		liver		

SU 28.10	SGD: 72		1
	Describe the applied anatomy of liver.	Human	
	Describe the clinical features, Investigations	Anatomy	
	and principles of management of liver		
	abscess,		
	hydatid disease, injuries and tumors of the		
	liver		
SU 28.11	SGD: 73		1
	Describe the applied anatomy of spleen.	Human	
	Describe the clinical features, investigations	Anatomy	
	and principles of management of splenic	-	
	injuries. Describe the post-splenectomy		
	sepsis - prophylaxis		
SU 28.11	SGD: 74		1
	Describe the applied anatomy of spleen.		
	Describe the clinical features, investigations		
	and principles of management of splenic		
	injuries. Describe the post-splenectomy		
	sepsis – prophylaxis		
	Describe and etiology and pathogenesis and		
	pathologic features of Tuberculosis of the		
PA24.5	intestine		
SU 28.12	SGD: 75		1
	Describe the applied anatomy of biliary		
	system. Describe the clinical features,		
	investigations and principles of		
	management of diseases of biliary system		
SU 28.12	SGD: 76		1
	Describe the applied anatomy of biliary		
	system. Describe the clinical features,		
	investigations and principles of		
	management of diseases of biliary system		
SU 28.12	SGD: 77		1

	Describe the applied anatomy of biliary		
	system. Describe the clinical features,		
	investigations and principles of		
	management of diseases of biliary system		
SU 28.12	SGD: 78		1
	Describe the applied anatomy of biliary	Human	
	system. Describe the clinical features,	Anatomy	
	investigations and principles of		
	management of diseases of biliary system.		
	Discuss Paediatric surgery biliary disorders.		
	Name & identify various peritoneal folds &		
	pouches with its explanation. Describe and

Internal Assessment Subject: General surgery and allied including Orthopedics Applicable for batches admitted from 2019 and onwards

Phase	IA – 1 -Exam			IA – 2 -Exam			
	Theory General Surgery Only (January)	Practical EOP	Total Marks	Theory General Surgery Only	Practical of Allied EOP	Total Marks	
				(May)			
Second	50	50	100	50	Orthopedics = 25	100	
MBBS					Radiodiagnosis =25		

Phase	IA – 3 -Exam			IA – 4 -Exam		
	Theory General Surgery + allied) (January)	Practical EOP	Total Marks	Theory General Surgery + allied) (April)	Practical of Allied EOP	Total Marks
III MBBS Part I	50	50	100	50	Orthopaedics =25 Anaesthesia =25	100

Phase	IA – 5 - Exam			Prelim Exam (As per university pattern)		
	Theory Gen Surgery + Allied (May)	Practical End of 8 Weeks posting	Total Marks	Theory	Practical	Total Marks
III MBBS Part II	100	100	200	100 x 2 papers = 200	200	400

(There will be FORMATIVE ASSESSMENT at the End of <u>four weeks Clinical Posting</u> of General Surgery NOT to be added to INTERNAL ASSESSMENT).

Assessment in CBME is ONGOING PRCESS, No Preparatory leave is permitted.

- 1. There shall be 6 internal assessment examinations in General Surgery including allied.
- 2. The suggested pattern of question paper for internal assessment internal examinations, except prelim examination is attached at the end. Pattern of the prelims examinations should be similar to the University examinations.
- 3. Internal assessment marks for theory and practical will be converted to out of 50 (theory) +50 (practical). Internal assessment marks, after conversion, should be submitted to university within the stipulated time as per directives from the University.
- 4. Conversion Formula for calculation of marks in internal assessment examinations

	Theory	Practical
Phase II	100	100
Phase III/I	100	100
Phase III/II	300	300
Total	500	500
Conversion out of	50	50
Conversion formula	Total marks in 6 IA theory examinations /10	Total marks in 6 IA Practical examinations / 10
Eligibility criteria after conversion	20 Combined theory+Practical=50	20

5. While preparing Final Marks of Internal Assessment, the rounding-off marks shall done as illustrated in following table.

Total Internal Assessment Marks	Final rounded Marks
33.01 to 33.49	33
33.50 to 33.99	34

- 6. Students must secure at least 50% marks of the total marks (combined in theory and practical / clinical; not less than 40 % marks in theory and practical separately) assigned for internal assessment in order to be eligible for appearing at the final University examination of that subject.
- 7. Internal assessment marks will not to be added to marks of the University examinations and will be shown separately in mark list.

8. Remedial measures

A. Remedial measures for non-eligible students

- i) At the end of each internal assessment examination, students securing less than 50% marks shall be identified. Such students should be counseled at the earliest and periodically. Extra classes for such students may be conducted, if needed.
- ii) If majority of the students found to be weak in a particular area then extra classes must be scheduled for all such students.
- iii) Even after these measures, if a student is failed to secure 50% marks combined in theory and practical (40% separately in theory and practical) after prelim examination, the student shall not be eligible for final examination.
- iv) Non eligible candidates are offered to reappear for repeat internal assessment examination/s, which must be conducted 2 months before next University examination. Extra classes for such students may be conducted for such students. The pattern for this repeat internal assessment examination shall be similar to the final University examination. Only the marks in this examination shall be considered for deciding the eligibility criteria. Following conversion formula shall be used for converting the marks.

	Theory	Practical
Remedial examination (as	200	200
per final examination)		
Conversion out of	50	50
Conversion formula	Marks in remedial theory examinations / 4	Marks in remedial Practical examinations/4
Eligibility criteria	20	20
afterconversion	Combined theory + I	Practical = 50

B. Remedial measures for absent students:

- i. If any of the students is absent for any of the 6 IA examinations due to any reasons, following measures shall be taken.
- ii. The student is asked to apply to the academic committee of the college for reexamination, through HOD, to ascertain the genuineness of the reason for absentee.
- iii. If permitted by academic committee, an additional examination for such students is to be conducted after prelims examination. Marks for such additional examination shall be equal to the missed examination.
- iv. Even if a student has missed more than one IA examination, he/she can appear for only one additional IA examination. In such scenario, eligibility should be determined by marks obtained in internal assessment examinations for which the candidate has appeared, without changing the denominator of 500.
