Opinion and suggestions	While the overall curriculum is very strong in theoretical as well as experiential pedagogy, there is need for more emphasis on entrepreneurial skills development through specific projects. I would also suggest considering forming a curriculum committee, experiential education committee). In any case, the community engagement is very unique. This alone makes the learning at PIMS a transformative and life changing experience for students.

Opinion and suggestions

"The academic curriculum in general appears to be well-structured and rigorous, providing students well-rounded education and the opportunity to explore different areas of interest.

One potential area of improvement could be the inclusion of more practical, real-world applications
